Office of Initial Patent Examination's
Filing Receipt Corrections,

Dear Sirs:

Re: United States C.I.P Patent Application No. 10/629,750
Filed: July 30, 2003
Title: Legal-For-Play Long And Belly Length Putter
Shaft Fitment System
Applicant: William Drossos
Priority from: US Patent Application No.10/196,140
filed July 17, 2002

This is a request for a corrected filing receipt. The incorrect priority application serial number is presently shown in the filing receipt.

37CFR 1.78 (a)(2)(iii) mandates that a later filed non-provisional application requires that the cross reference to the earlier filed application be included in an application data sheet or the specification must contain such reference in the first sentence following the title, or be so amended. In the present Continuation-in-Part application the specification contained, in the first sentence following the title, the correct cross-reference to the related earlier filed application, serial no. 10/196,140. The application transmittal sheet however contained an incorrect priority application serial number. The incorrect serial number was 09/426,883. The incorrect serial number was copied into the filing receipt for this application. Please provide a corrected filing receipt indicating the correct priority application serial number, namely, **10/196,140**.

We enclose for your ease of reference a copy of the filing receipt showing the corrected priority application serial number and a copy of the first page of the specification.

We look forward to the corrected filing receipt in due course.

Yours truly,

PETRAROIA LANGEORD EDWARDS & RUSH

Receipt is acknowledged of this regular Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Filing Receipt Corrections, facsimile number 703-746-9195. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

Title

Legal-for-play long and belly length putter shaft fitment system

Preliminary Class

LEGAL-FOR-PLAY LONG AND BELLY LENGTH PUTTER SHAFT FITMENT SYSTEM

Cross Reference to Related Application

5 This application claims priority from United States Patent Application No. 10/196,140 filed July 17, 2002 entitled Long and Belly Putter Shaft Fitment System.

Field of the Invention

10 The invention relates to a method and apparatus for fitment of elongated putters for play in accordance with the rules of golf.

Background of the Invention

15 So called long and belly length putters offer many golfers the potential to achieve a smoother more pendulum like putting stroke advantageously improving the golfers likelihood of making a putt. The primary disadvantage of a long and/or belly putter is that a golfer must be properly fitted to be comfortable when using the putter in order to achieve a beneficial result. Further, some long putters may be too long to facilitate ease of storage
20 and/or storage for the purpose of transportation. The present invention is an improvement over the prior art wherein threaded shafts, jam nuts, detent pins, tapered shanks, collapsible shafts, lock nuts, threaded pins, removable grips, compression rings, conical bushings, locking pins, and set screws or combinations thereof are used as the primary means of adjustment for fitting
25 or connection of the upper and lower shaft segments of a long or belly putter. These mechanisms are of unnecessarily complicated design, and in some cases lacking user friendliness and may be illegal for play in accordance with the United States Golf Association and or the Royal and Ancient Rules of Golf of Saint Andrews, Scotland or the Royal Canadian Golf Association.
